

True Automation, Inc.

Position Announcement

www.trueautomation.com

Full Time Position Title:

C# Application Developers

Company Overview: True Automation, Inc. is the premier provider of property tax and appraisal solutions in Texas, complimented by GIS Integration Services. Incorporated in 1997, True Automation has quickly become the most progressive **Computer-Aided Mass Appraisal (CAMA) and Tax Collection Software Package** used by local governmental agencies (County Appraisal Districts and Tax Collection Offices). We entered the national market in 2008 with a complete software revision built on the .NET platform. At True Automation our most valued assets are our 90+ employees and the relationships we build with our customers. TA annually has been named one of the Fastest Growing Technology Companies by the Metroplex Technology Business Council.

We are currently seeking junior to mid-level software engineers who have the following skills and capabilities: Qualified local and eligible (US citizens or Green Card status) applicants are encouraged to apply.

Job Summary & Requirements:

- An understanding of object-oriented design and object-oriented programming languages.
- A working knowledge of C#. Experience preferably in a WinForms environment.
- A solid understanding of fundamental database concepts and experience with Microsoft SQL Server.
- A high aptitude to tackle and solve problems.
- Excellent communication, skills both written and verbal.

Desires:

- Experience working in Visual Studio, preferably 2008.
- Experience using Microsoft Team Foundation Server for task tracking and source control.
- Crystal Reports experience.

If you enjoy working in a dynamic and challenging team environment then read on! True Automation consists of a development team focused on building solid code, a quality review process integrated with the development team from the beginning of the product cycle, and management that allows you to focus on what you do best – solving problems.

Our core product is an n-tier application with a C#.NET Winforms application front-end, a middle-tier application server and a Microsoft SQL Server back-end. We are seeking engineers that can assist in the continued development of our next-generation product and who want to work on the cutting edge of business application development.

In exchange for your hard work and dedication, we offer a competitive salary (based on experience), a great office environment and generous benefits package-including a 401(k) plan with company matching funds. The positions are based in Plano, TX, a northern suburb of Dallas, TX. We are looking for ambitious engineers who relish the challenge of building good software. If you want to make an immediate impact in an organization with the same ambitions and have the listed skills, we encourage you to apply.

Email your resume, a cover letter and salary expectations to jobs@trueautomation.com. Franklin Wilson.
