**True Automation Announces PACS.Sketch™,  
Embeds RapidSketch™ into PACS Appraisal™**

**DALLAS – December 29, 2008** – True Automation, the leading provider of property appraisal and tax collections software tools, acquired the source code of RapidSketch from Utilant LLC. The RapidSketch capability will now be embedded in the software for True Automation clients that purchase a PACS Appraisal license.

Current users of PACS have always had the ability to produce home and building sketches for the purpose of appraisal, but now they will have much more functionality with RapidSketch embedded natively into the PACS application for seamless usage. In most cases, users will be able to import sketches that have been previously created in other sketching tools. This will also eliminate the need for two software licenses and the subsequent maintenance associated with owning two software programs.

“True Automation is enthusiastic about being able to offer PACS users direct access to one of the top-rated sketchers in the industry,” said Osvaldo Morales, president of True Automation. “We researched the market to find the right provider of this technology and RapidSketch came out as a clear, top-tier sketching tool that will provide our customers with the functionality that they need. We are continually expanding the capabilities of PACS Appraisal and this extension makes perfect sense given our current customers’ needs.”

“We are excited about the opportunity to offer embedded use of our superior sketching program to True Automation PACS users,” said Patrick Davis, CEO of Utilant. “True Automation is a clear industry leader for CAMA solutions and we are pleased to have them offering our solution in such a widely adopted program such as PACS Appraisal. Our technology will be used by hundreds of appraisers nationwide. We couldn’t ask for a better integration partner in this industry.”

The RapidSketch technology will be immediately embedded into True Automation’s new PACS 9.0, with additional plans to offer it to existing PACS 8.0 users. The product will be re-branded with the name PACS.Sketch, to complement True Automation’s existing suite of products including PACS Appraisal, PACS Collections™, PACS.Online™ and PACS.Query™.

**About True Automation**

True Automation is one of the fastest growing providers of property tax and assessment solutions. True Automation’s suites of solutions include PACS Appraisal, PACS Collections, Truth-in-Taxation.com, GIS Integration Services, and PACS.Online. Began in 1990 and incorporated in 1997, True Automation has quickly become the most progressive software provider for county treasurers and assessors. Since then, True Automation has grown to over eighty five employees, and 160 customers located in the states of Texas, Washington and Alaska. True Automation has enjoyed this revolutionary growth due to its unrivaled understanding of the property tax collection and assessment process and its aggressive commitment to meeting the needs of its customers.
